FINAL EXAMINATION

TRIMESTER 3, 2021/2022

BAC1644 – PRINCIPLES OF FINANCE

(All sections / Groups)

10 AUGUST 2022
9.00 a.m. – 12 p.m.
(3 Hours)

INSTRUCTIONS TO STUDENTS

1. This question paper consists of **FIVE (5)** pages excluding the cover page.
2. Answer **ALL** questions.
3. Marks allocations are shown at the end of each question.

Answer all questions in the answer booklet provided.

Question 1 (25 marks)

(a) Explain the usefulness of DuPont identity to a financial manager. (5 marks)

(b) Your friend, Jack, is considering investing in the stocks below. Your friend performs a ratio analysis for the four stocks which are from different industries. But your friend is confused and seeks advice from you.

Ratio	Electric utility stock	Food & beverage stock	Software stock	Machinery stock
Current ratio	1.10	1.3	6.8	4.5
Quick ratio	0.90	0.82	5.2	3.7
Debt ratio	0.68	0.46	0.0	0.35
Net profit margin	6.2%	14.3%	28.5%	8.4%

(i) Discuss the problem your friend may face in comparing these companies to one another based on the ratios. (4 marks)

(ii) Explain to him why the current and quick ratios for the electric utility and the fast-food stock be so much lower than the same ratios for the other companies. (4 marks)

(iii) Why might it be all right for the electric utility to carry a large amount of debt, but not the software company? (4 marks)

(iv) Explain to him whether he should invest all his money in software companies instead of in less profitable companies. Relate the discussion with risk and return. (4 marks)

(c) Jet Sdn Bhd has adopted a policy in which no additional external financing will be sought by the company. Given the net income is RM12,100, total equity of RM94,000, total assets of RM156,000 and a 40% dividend payout ratio, calculate the maximum growth rate for the firm. (4 marks)

Question 2 (25 marks)

(a) Ahmad has RM10,000 that he can deposit in any of three savings accounts for a 3-year period. Bank A compounds interest on an annual basis, bank B compounds interest twice each year, and bank C compounds interest each quarter. All three banks have a stated annual interest rate of 4%.

Continued...

(i) Calculate the amount that Ahmad would have at the end of the third year leaving all interest paid on deposit, in each bank. (3 marks)

(ii) Calculate the effective annual rate (EAR) he would earn in each of the banks. (3 marks)

(iii) Based on your calculation in (i) & (ii), which bank Ahmad should deal with. Explain your reason. (3 marks)

(iv) If a fourth bank (bank D), also with a 4% stated interest rate, compounds interest continuously, calculate the amount that Ahmad would have at the end of the third year. Does this alternative change your recommendation in part (iii)? Explain why or why not. (3 marks)

(b) Ahmad invests RM10,000 today into an investment account. He expects to earn 8 percent, compounded annually, on his money for the next 26 years. After that, he wants to be more conservative, so he only expects to earn 5 percent, compounded annually. Calculate the money he will have in his account when he retires 38 years from now, assuming no further deposit is made. (5 marks)

(c) You want to save money for your dream home. Your plan is to make regular deposits into a brokerage account which will earn 14 percent. You deposit RM5000 today. You also plan to make four additional deposits at the beginning of each of the next four years. You also plan to increase deposits by 10 percent a year. Calculate the amount you have after five years. (8 marks)

Question 3 (25 marks)

(a) Hussein Berhad is unlevered and is valued at RM640,000. The company is currently deciding whether to include debt in its capital structure. The current cost of equity is 12%. Under consideration is issuing RM300,000 in new debt with an 8% interest rate. Hussein Berhad would repurchase RM300,000 of stock with the proceeds of the debt issue. There are currently 32,000 shares outstanding and its corporate tax rate is 30%. Calculate the company's new WACC according to Modigliani-Miller Theory. (9 marks)

Continued...

(b) You are considering two mutually exclusive projects, Project X and Project Y for your company. The relevant cash flows are in the following table. The company has historically used a four-year cutoff for projects. The required return is 11 percent.

Year	Cash Flow (Project X), MYR	Cash Flow (Project Y), MYR
0	-82,000	-125,000
1	15,700	38,600
2	18,300	33,400
3	23,900	31,200
4	26,200	27,500
5	32,100	24,000

(i) Calculate payback for Project X and Y. (3 marks)

(ii) Calculate the net present value (NPV) for Project X and Y. (3 marks)

(iii) Which project should you accept based on the techniques above? (3 marks)

(c) A firm wants to create a WACC of 10.4 percent. The firm's cost of equity is 14.5 percent and its pretax cost of debt is 8.5 percent. The tax rate is 25 percent. What does the debt-equity ratio need to be for the firm to achieve its target WACC? (7 marks)

Question 4 (25 marks)

(a) Explain why a firm might prefer a stock repurchase rather than an increase in the firm's regular dividend. (5 marks)

(b) Explain how a firm determines whether to have a restrictive or flexible financial policy. (5 marks)

(c) GunaBina Berhad has a yearly revenue of RM50,000,000 and maintains an average inventory level of RM15,000,000. The average account receivable balance outstanding is RM10,000,000. The company makes all purchases on credit and has always paid on the 30th day. The company is now going to take full advantage of trade credit and pays its suppliers on the 40th day. Calculate the net change in the cash conversion cycle if revenues can be maintained at existing levels but inventory can be lowered by RM2,000,000 and accounts receivables lowered by RM2,000,000. (One year= 360 days) (8 marks)

(d) Your company uses 60,000 units of a product per year. The cost of ordering it is RM200 per order, and the cost of carrying it in inventory is RM1 per unit per year. The firm uses it at a constant rate every day throughout the year.

(i) Calculate the Economic Order Quantity (EOQ). (4 marks)

(ii) Assuming that it takes 20 days to receive an order once it has been placed, determine the reorder point. (Use a 365-day year) (3 marks)
